

PRESS RELEASE Alumil Participates in Big 5 Construct South Africa 2026

Cairo, Egypt – Alumil, a global leader in architectural aluminum systems, proudly announces its participation in Big 5 Construct South Africa 2026, one of the most influential construction industry events in the region. Through this strategic participation, Alumil reinforces its commitment to expanding its footprint across the African market, while showcasing its latest innovative solutions tailored to modern architectural demands. At the exhibition, Alumil will present a wide range of advanced solutions, including sliding, hinged, and minimal systems, alongside integrated design applications and architectural enhancements. The booth has been carefully designed to deliver a dynamic and immersive experience, highlighting the company's engineering excellence, product versatility, and premium positioning. This participation aligns with Alumil's broader vision to strengthen partnerships, engage with key industry stakeholders, and position itself as a trusted reference within the architectural and construction sector across Africa. Visitors are invited to explore Alumil's latest innovations and connect with the team to discover how the company continues to deliver its promise of "Building Excellence Every Day." About Alumil: Alumil is one of the most advanced aluminum extrusion and architectural systems companies worldwide, with a strong international presence in over 60 countries. The company delivers high-quality, sustainable, and innovative solutions designed to meet the evolving needs of modern architecture.
