

AFRICAN ELEPHANT WOOD ZERP

COMPANY PROFILE

African Elephant Wood is a dynamic and forward-thinking company situated in the heart of the NKOK Industrial Park in the Republic of Gabon. Established in 2022, we have rapidly emerged as a key player in the wood industry, committed to the sustainable harvesting and processing of Gabon's rich forest resources.

Our mission is to harness the bounty of Gabon's forests to produce high-quality wood products that meet international standards while ensuring the long-term health and biodiversity of our forests. We aim to achieve this through responsible logging practices, investment in local communities, and the adoption of innovative technologies.

We are dedicated to sustainable forestry management. We adhere to the Gabonese Forest Code, which ensures the natural regeneration of forests and the sustainable supply of raw materials. Our logs are sourced from sustainably certified forests, and we prioritize traceability, working with the independent agency Tracer-Nkok to ensure that all wood entering our facility is legal and responsibly sourced.
